

INVITATION

COMPREHENSIVE RESEARCH

ON THE CAUSES AND CONSEQUENCES OF THE GLOBAL CHANGE

at the Global Change Research Institute CAS

Are you concerned with the following issues?

- climate analysis and climate modeling
- prediction of drought and other extreme events, seeking appropriate adaptation strategies to mitigate the negative consequences
- assessment of the current state and alterations in vegetation in the changing climate conditions through the use of aerial photography
- controlled experiments, simulation of the environment expected in the context of the global change, identifying plant responses and proposing measures for their cultivation
- evaluation of the social impacts of the global change, including the prediction of risk management

Are you interested in what your colleagues are doing in this field or, perhaps, are you looking for a cooperating institution? Then, the presentation of the scientific teams of the Centre of Excellence Global Change Research Institute of the Czech Academy of Sciences – CzechGlobe is just for you.

By this we would like to invite you to a workshop focusing on presenting selected CzechGlobe research activities in order to establish new partnerships and cooperation.

The workshop will be held **on Wednesday, 13th April 2016 from 10:00 a.m.** in the premises of the **Czech Liaison Office for Development and Innovation (CZELO), Rue du Trône 98, 1050 Ixelles, Bruxelles.**

Patronage over the event was taken by **Ing. Evžen Tošenovský, dr.h.c.** Member of European Parliament, Member of the Committee on Industry, Research and Energy.
